Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to suggest the claimed system of manufacturing an air bag cover assembly, particularly that the system be capable of having at least one infrared lamp emit infrared radiating at the infrared absorbing material when the infrared absorbing material is disposed between the at least one infrared lamp and infrared shield.

The system of Lanser depicted in Figures 1 and 2 is not capable of this because the configuration of the infrared lamp 30 and the reflector/shield 36 surround the infrared absorbing material and there is no way for it to be positioned between the lamp and shield. There is no motivation or suggestion to have the lamp and shield arranged such that infrared absorbing material would be between them.

The system of Lanser depicted in Figure 3 has light emitted from a lamp through two optic fibers positioned on either side of the infrared absorbing material. There is no mention of a reflector or shield in this configuration and there is no suggestion to include a shield such that the system would be capable of having the infrared absorbing material between a lamp and a shield.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
